Note 1: The Company defines adjusted earnings before interest, taxes, depreciation and amortization ("Adjusted EBITDA") as net income, excluding discontinued operations, income taxes, other income, interest (income) expense, net, (gain) loss on sale of assets and depreciation and amortization. Other companies may define Adjusted EBITDA differently. Adjusted EBITDA is presented because it is a financial measure that is frequently requested by third parties. However, Adjusted EBITDA is not considered under generally accepted accounting principles as a primary measure of an entity's financial results, and accordingly, Adjusted EBITDA should not be considered an alternative to operating income, net income, or cash flows as determined under generally accepted accounting principles and as reported by the Company.
